Calculating the price of your mailing

Step 1: Find the full price for the service from table 1

Step 2: Identify the appropriate sortation and machineability discounts from table 2

Step 3: Add to the sortation and machineability discount the applicable volume related discount from table 3

Step 4: Apply the aggregate discount to the full price to calculate the item price for direct and residue items.

Step 5: Multiply the direct and residue prices by the number of items in each category.

Step 6: Add the direct and residue values together to calculate the total transaction price.

Worked example

A Mailsort 3 700 posting of 102,439 letters weighing 72g each. 98,277 of these are direct and 4,162 are residues.

- o Step 1: The full price for a Mailsort 3 700 Letter = 20.2p from table 1

- Step 2: Sortation and machinability discount for direct = 19.3% from table 2
Sortation and machinability discount for residue= 12% from table 2
- Step 3: VRD from table 3 = 4.5%, added to the direct discount of 19.3% the total discount for direct items now becomes 23.8%
- Step 4: Price of directs = $20.2\text{p} * (100\% - 23.8\%) = 15.3924\text{p}$
Price of residues = $20.2\text{p} * (100\% - 12\%) = 17.78\text{p}$
- Step 5: Total price of directs in mailing = $(15.3924\text{p} * 98,277)/100 = \text{£}15,127.19$
Total price of residues in mailing = $(17.78\text{p} * 4162)/100 = \text{£}740$
- Step 6: Total price for transaction = $\text{£}15,127.19 + \text{£}740.00 = \text{£}15,867.19$

Calculating the price of your mailing

- Step 1: Find the full price for the items you are mailing. For items up to 250gm this just requires reading off the full price from table 1 for the service used and the format of the items mailed. Above 250gm Royal Mail uses straight line pricing, the full price for a specific weight is calculated by taking the full base price shown for the weight band and adding in the appropriate per gram supplement. This result is rounded to the 1/10th of a penny.
- Step 2: Identify the appropriate sortation and machineability discounts from table 2
- Step 3: Add to the sortation and machineability discount the applicable volume related discount from table 3
- Step 4: Apply the aggregate discount to the full price to calculate the item price for direct and residue items.
- Step 5: Multiply the direct and residue prices by the number of items in each category.
- Step 6: Add the direct and residue values together to calculate the total transaction price

Worked example

A Mailsort 2 1400 posting of 102,439 Large letters weighing 302g each. 98,277 of these are direct and 4162 are residues.

- Step 1: The full price = $38.6p + ((302 - 250) * 0.1325) = 45.49$ rounded = 45.5p
- Step 2: direct discount = 11%, residue discount = 6% from table 2
- Step 3: VRD from table 3 = 4.5%, added to the direct discount of 11% the total discount for direct items now becomes 15.5%
- Step 4: Price of direct = $45.5p * (100\% - 15.5\%) = 38.4475p$
Price of residue = $45.5p * (100\% - 6\%) = 42.77p$
- Step 5: Price of direct in mailing = $(38.4475p * 98,277) / 100 = £37,785.05$
Price of residue in mailing = $(42.77p * 4162) / 100 = £1,780.09$
- Step 6: Total for this transaction = $£37,785.05 + £1,780.09 = £39,565.14$

18. Term Contract

Product and Class of service*	Contract duration	
MS120-1, MS120-2, MS120-3, MS700-1, MS700-2, MS700-3, MS1400 -1, MS1400-2, MS1400-3	1 Year	2 Year
Discount (per year)	1.40%	2.00%

*minimum annual volume of 1 million mail items applies per product and class of service contracted

19. Mailsort Light

The discount for Mailsort Light remains at 4.5p per item.

20. Mailmedia

See pricing calculator at:

<http://www.royalmail.com/portal/rm/content1?mediald=41400693&catId=600108>

Volume Related Discounts

Volume related discounts are not available for Presstream or Presstream Walksort.

Calculating the price of your mailing

- o Follow the steps shown for Mailsort 1400 as relevant save that step 3 should be ignored as there are no VRDs available on Presstream or Presstream Walksort

23. Presstream Profile Price Discounts

Profile discount % = A x B

A (%) = ((number of Direct Selection items going to qualifying postcodes / the total number of Direct Selection items) x 100) x 0.645 - 4.0

B = total number of Direct Selection items / the number of unique Direct Selection addresses

Calculated to one decimal place

Presstream Profile – Minimum Prices

Maximum discount allowed – 28%

	Minimum Price
Presstream profile 1st Cl	24.7
Presstream profile 2nd Cl	22.7
Presstream Walksort profile 1st Cl	23.3
Presstream Walksort profile 2nd Cl	21.5
